OVER 200 ACRES DEVOTED
TO THE GROWING OF
FIELD GROWN TREES
AND PLANTS THAT
WILL PLEASE YOU

When you have looked over this booklet, if you do not see what you want, write us. We will be glad to give you the information wanted. Do not fail to get our quantity prices before buying. We will always save you money.

Higginson, Arkansas

GENERAL INFORMATION

SHIPPING DIRECTIONS—Give explicit directions for marking and shipping stock. In case no directions are given, we will ship the cheapest and most direct route by freight, unless it is deemed safest and best to ship by express. In all cases, the shipments will be at the risk of the purchaser, and, if delay or loss occurs in transit, the forwarders alone must be held responsible.

Orders may be accompanied with a check, draft, postoffice, or express money order for the amount. If neither can be obtained, enclose currency in registered letter with order, or if C. O. D. wanted, send 25 per cent cash with order and other will be sent C. O. D. and to enable you to get your order out early, send it in now; this to apply to early order. After shipping seasons begins we will be able to ship promptly on receipt of your order.

ERRORS—Customers are requested to send notice at once of any error that may be made in filling their orders so that it may be rectified and explained.

ARTICLES BY MAIL—Packages of small articles can be sent by mail, for the convenience of those who cannot be reached by railroad or express.

THE SHIPPING SEASON—There can be no definite time specified for beginning to ship, either in the spring or fall. That is regulated by the opening of the season — early or late — and by the ripening of the stock in the fall; as the season for planting is not regulated so much by any particular month or day, nor by the state of vegetation, but more particularly by the condition of the trees to be planted. It is therefore better that orders be sent in early so that stock can be shipped or delivered at the proper season in good condition.

We replace all stock that die first year at half price, if customer has taken reasonable care of it.

Further, it is mutually understood by purchaser that no salesman has the authority to change terms of replacement other than herein given, and for replacement on terms listed, the customer is to notify the Company at Higginson, Arkansas, by letter, giving such information as they may request from time to time, and that the replacement cost is to be paid in advance of shipment, all replacements to be f. o. b. Nursery, Higginson, Arkansas, in season following agreement on goods to be replaced.

· GUARANTEE OF GENUINENESS

While the greatest diligence and care to have all trees, etc., true to label, will be expressed, mistakes may occur, and in such cases, upon proper proof, the trees, etc., will be replaced free of charge, or the amount paid refunded, the method is to be at our option, replacement of goods or refund amount paid for them, but it is mutually understood and agreed to between the purchaser and ourselves that the guarantee of genuineness shall in no case make us liable for any sum greater than that originally paid for the Trees, Shrubs, Roses, Seeds, Plants, etc., that prove untrue.

CHOICE PEACH TREES

THRIFTY — HEALTHY — THEY GROW

✓ MAYFLOWER.—A "Red allover" peach; handsome, good of splendid quality. Fine for home orchards and finds ready sale on the market. Not so good for commercial orchards as Early Wheeler, but should be in every home orchard. Ripens in May; semi-cling.

✓ EARLY WHEELER.—The most profitable peach grown for commercial purposes. The fruit is large, very handsome, a clear cream overspread with crimson; cling; ripens in June.

RED BIRD.—A fine early peach; bright, glowing red. Flesh juicy, firm and most delicious peach flavor imaginable. Tree hardy and vigorous. Ripens in June.

✓ GOLDEN JUBILEE.—A high quality early freestone peach, a typical Elberta type fruit, highly colored, ripening about four weeks before the regular Elberta, a second generation seedling of the Elberta crossed with the Greensboro, the tree is unusually hardy, the buds will resist winter freezes well, and open after Elberta, which will insure a regular crop, the blossom self-fertile, the peach is a medium to large size and firm. It has proven a good shipper. The Golden Jubilee stands without an equal as an early yellow, freestone peach.

✓ MURRAYS BEAUTY.—A high quality peach, early ripening, just after the Early Wheeler — Red Bird peach, tree very hardy, buds will resist winter freezes better than Elberta, Early Wheeler and others, a good shipper, fruit medium to large yellow semi-cling, try some of them and they will please you. Murrays will make a crop when other varieties fail.

✓ ARP BEAUTY.—Yellow, with bright blush; a firm juicy, and excellent Peach of unusually good flavor; freestone; ripens the last of June, early July.

✓ MAMIE ROSS.—One of the most widely planted of the white peaches in the South. It is extremely hardy and very productive. Semi-cling; ripens ten days before Elberta. Cream-colored, often marked with red. Skin tough, though rather thin; ships well if picked before full ripe. Flesh white; tinged with red near the seed. Tender, juicy, sweet and of good quality.

✓ HILEY.—Freestone-White, a large white peach, with beautiful red cheek, flesh is juicy, tender; a good shipper, when properly handled, should be in every orchard.

✓ BELLE OF GEORGIA.—The best white peach for home and commercial planting. Ripens a week before Elberta. This is the famous Belle of Georgia; freestone; of splendid quality; very large; showy.

✓ ELBERTA.—The most widely known of all peaches. Very attractive in appearance; large size; deep yellow, splashed crimson; perfect freestone; ripens in midsummer. Can be grown profitably in the North, South, East and West. Tree very vigorous and highly productive.

✓ CHAMPION.—Freestone; white with red cheek. Large size; juicy, sweet and delicious. Bears young and the tree is very vigorous. July and August.

✓ ROCHESTER.—A yellow freestone variety, ripening about August. Fruit is large, yellow, sweet, juicy and of delicious flavor; keeping and shipping well.

✓ J. H. HALE.—It averages one-third larger than Elberta, ripens about five days earlier. Color a beautiful golden-yellow. Freestone.

LATE CRAWFORD.—A superb large, yellow peach. One of the best. Late September.

CHINESE CLING.—Oblong, creamy, occasionally tinged red; juicy; ripe in July and August. Well known, popular, good for home orchards and nearby markets.

ELBERTA CLING.—Like Elberta, except that it is a cling. It is a seedling of Elberta, large yellow, round with a bright red cheek. Good for eating and especially fine for pickling, canning and preserving.

INDIAN CLING.—Fruit large, dark down with deep and red veins, downy; flesh dark red, juicy, and of rich flavor; an old standard sort; cling. August.

HEATH CLING.—An old favorite. Large, creamy white; thin skin; white flesh, very firm. Fine for preserves and pickling. Ripe in August.

KRUMMEL'S OCTOBER.—A magnificent peach; the most prolific and best late yellow freestone, which ripens about two weeks after Salway, or four weeks after Elberta. Large, almost round, deep yellow with a dark carmine blush; very firm, fine texture.

STINSON.—White, red cheeks; regular, one of the best all-around late peaches; clingstone. October.

PLUMS

(WHOLE ROOTS)

DAMSON.—A medium sized, dark purple variety which is very productive; esteemed for preserving and good for eating out of hand. Ripens late August to early September.

ABUNDANCE.—One of the most dependable of the plums. Bears year in and year out. Large size; cherry red; firm and sweet; carries well. Middle of June.

BURBANK.—Extremely popular in all sections. Richly colored red mottled and dotted with yellow; a very heavy bearer. Ripe in July.

GOLD.—An old favorite. Medium size; golden yellow when ripe; quality good. Very heavy bearer; ripens late.

RED JUNE.—One of the most popular of the early plums. A dark color, showy and attractive; excellent quality. Tree hardy and a sure bearer.

WICKSON.—Large, heart-shaped; bright red, with heavy blooms; flesh yellow, melting, and good. Tree an upright, vigorous grower. July.

WANETA.—Cross between Terry and a Japanese plum. Regarded as the largest and best all around newer sort. Bright red, delicious quality, small pit, skin free from acidity; very productive and an early bearer, often producing fruit 2 inches in diameter. This is Prof. Hansen's masterpiece in plums and you will make no mistake in planting them liberally. Mid-season.

SAPA.—Skin green, then turns black and the flesh is royal purple. Delicious as a fresh fruit and excellent for preserves and jelly. Good shipper. Mid-season.

	Each	10	100

APPLES

RED JUNE.—One of the best early apples for table and market. Medium, deep red, flesh white, crisp, excellent. June.

DELICIOUS (Red).—A remarkable variety taking first rank both for commercial and home orchards. Fruits large, neatly covered with brilliant dark red; flesh fine grained, crisp, and melting; juicy, with a delightful aroma; of very highest quality. A splendid shipper, bearing annually.

DELICIOUS (Yellow).—A very remarkable apple, it is agreed by many, by far the best apple of the two delicious varieties. You will find the trees to grow off better, more quickly coming into bearing. Within a very short time it will be producing a crop of beautiful yellow apples, that will bring good prices on the market and you will be pleased with them in every way. Don't fail to plant heavily of our Yellow Delicious.

YELLOW TRANSPARENT.—Widely known and well liked; large size; transparent yellow. Quality good; crisp, sub-acid, and very fragrant; an excellent cooker; fruit tender and requires careful handling. Tree bears young and is of rather dwarfish growth; is extremely hardy. June.

EARLY HARVEST.—Medium, bright straw color; tender, sub-acid; fine desert and cooking apples. Must be handled very carefully for market. June.

RED ASTRACHAN.—Medium, flat; deep crimson, occasionally greenish yellow in the shade; flesh white, moderately juicy; flavor quite acid, rich; very productive. July.

MAIDEN BLUSH.—Large, beautiful, blush cheek. Summer.

HORSE.—A popular Southern apple; large, oblong; yellow; fine for cooking and drying. July.

TOLMAN.—Medium yellow and red, rich, sweet. The most valuable apple for baking, and otherwise fine. Summer.

GANO.—Large, roundish, oblong, very similar in every respect to Ben Davis, but of a rich red color. Largely planted in commercial orchards in the Southwest. September.

GRIMES.—A golden yellow apple that is an old favorite over the United States on account of its beauty and size. The tree is very productive and long lived; a splendid variety for commercial planting as well as for home orchards. September.

WEALTHY.—Medium size, smooth, round, deep red; handsome and of fine quality. October to November.

ARKANSAS BLACK.—Dark red, almost black; medium to large size; of very attractive appearance, one of the best. September to October.

BEN DAVIS.—The well-known standard variety. Medium to large; yellowish covered with red; flesh white; tree vigorous and productive, carrying its fruit well through the warm, dry summers of the Southwest. Ben Davis Apples grown in the Southwest, particularly in Texas are much superior to those grown further north. September.

JONATHAN.—One of the surest varieties; it never disappoints. A brilliant red, with spicy flavor; a favorite with all lovers of juicy, acid apples. Highly profitable for markets and a splendid variety for the home orchard. Ripe in September. Bears young and is very prolific. If you have room for only one apple tree, Jonathan is the one you want.

GOLDEN WINE SAP.—A fine new yellow apple, but will do well any place the old time Wine Sap is grown. The fruit is some larger than old Wine Sap, good keeper and should be widely planted.

DUCHESS (Red).—Of the same strain old time Duchess, but will ripen up, and have beautiful red color, that is pleasing and will make a ready saleable fruit; will keep well and easy to handle. Every home and commercial orchard should plant them.

STAYMAN WINESAP.—The largest of the Winesap family. It

resembles the Winesap in color, being striped and splashed with dark crimson, although the color is not quite so brilliant. It is larger in size than the old Winesap and of better quality. For table use, Stayman Winesap is one of the best apples grown. Late fall.

WINE SAP.—One of the oldest of American apples and still increasing in favor. Its size, color, and particularly its quality, have given it the well-deserved popularity it has enjoyed. It is of medium size vivid red, with a highly satisfying flavor. It is one of the best keepers of all the apples. It is an all-purpose apple and a good one. September.

MISSOURI PIPPIN.—Large; mostly red; good quality; an early bearer; good keeper; fall.

YORK IMPERIAL.—An attractive red apple with faint stripes of darker red; good quality, crisp, firm, and of fine texture. The tree is long lived and bears freely and regularly. Succeeds well in the Southwest. York Imperial is an excellent apple for the commercial trade because of its good shipping and keeping qualities. We have an excellent stock. September and October.

MAMMOTH BLACK TWIG.—Large; yellow, shaded red; flesh pale yellow, tender, juicy, mildly subacid, rich; tree vigorous and very productive when at full bearing age. A good seedling of Winesap, succeeding over a wide range. September to November.

ROME BEAUTY.—Large, yellow, shaded red; tender, juicy, subacid. A leader in Ohio District. Fall.

JONATHAN.—Double red. A new type of the old time Jonathan apples, having all of the good parts of the old time one, trees very much alike, in growth, habits, and all with the deep double red added to all its good qualities, is the description that has been passed on to us. We have about 2,500 trees for the coming planting season. Order early of you want to get some of them.

CRAB APPLES

TRANSCENDENT.—Fine for canning, preserving, and pickling. Fruit medium large, golden yellow, rich crimson cheek, specked with white spots. Noted for its fine flavor when ripe. September and October.

WHITNEY.—Fairly large sized fruit. Fine eating or for cider; skin smooth, glossy green striped, splashed with carmine; firm, juicy, and sweet; a heavy bearer and very popular crab. September and October.

HYSLOP.—Large size, dark red; in clusters; very acid. August.

	Each	10
2-3 ft.	\$.75	\$ 7.00
3-4 ft.	1.00	9.00
4-5 ft.	1.40	12.00

PEARS

GARBER.—Should be planted in the South where other pears will not grow, especially in connection with the Keifer. The Garber is a large yellow pear with red cheek. It keeps remarkably well and is a splendid shipping pear. August.

BARTLETT.—Large, buttery, juicy, high flavored, great bearer; very popular. August and September.

LE CONTE.—Medium, bell-shaped, smooth; creamy yellow with slight blush; fresh crisp, sweet and juicy. Tree a rapid grower and a young and prolific bearer, but more subject to blight than most varieties. Ripe in July.

KEIFER.—The best known of all pears. Very large; yellow; successful everywhere. Should be gathered when mature and allowed to ripen in storage. Tree very vigorous, resisting blight; ornamental, and immensely productive. Garber should be planted with Keifer to insure best pollenizing. August and September.

	Each	10	100
2-3 ft.	\$.75	\$ 7.00	\$ 65.00

5-6 ft.	1.50	14.00	135.00

APRICOTS

EARLY GOLDEN.—Medium to small, light, orange, yellow, flecking with red; flesh tender, juicy, sweet, and of good quality; productive.

MOORPARK.—Large, yellowish green with brownish red on sunny side, marked with dark specks; flesh bright orange; separates readily from seed. Grown largely for commercial purposes especially for canning and drying. Tree vigorous and prolific.

ROYAL.—An European variety; large, slightly oval; dull yellow with red next to sun; flesh orange, with rich flavor. An important commercial variety, producing fruit freely, and of a quality that appeals to the buyer of high-grade stock.

	Each	10	100
2-3 ft.	\$.75	\$ 6.50	\$ 50.00
3-4 ft.	1.00	9.00	85.00

FIGS

MAGNOLIA.—Large, purple violet of the Adriatic class; flavor excellent; bears on one-year stem. Largely grown in commercial orchards.

BROWN TURKEY.—Adriatic. Medium; violet brown; sweet and good. Has the habit of bearing on the new shoots, even in the nursery row.

CELESTIAL.—Makes large trees; hardy farther north than most other varieties. Small, pale-violet fruit, fine flavored, very early, commencing to ripen in June and continuing two months.

BRUNSWICK.—Large; irregular; light violet; quality excellent. Very reliable and prolific.

	Each	10	100
1-2 ft.	\$.65	\$ 6.00	\$ 50.00
2-3 ft.75	7.00	65.00

CHERRIES

EARLY RICHMOND.—Medium size, clear red, and quite acid. Ripens May and June.

ENGLISH MORELO.—Very dark sour cherry; latest to ripen. One of the best cooking cherries. Dwarfish-growing tree. Especially good for garden planting.

MONTMORENCY ORDINARIE.—Large, red, acid, exceedingly productive. Late June.

DYEHOUSE.—A sure bearer, largely planted for early market; ripening a week before Early Richmond, which it closely resembles. June.

Sweet Cherries

BLACK TARTARIAN.—Large; black; heart-shaped; very juicy and sweet.

BING.—Very large, dark brown, almost black; flesh firm, sweet, rich, and delicious. One of the most profitable sorts. July.

GOVERNOR WOOD.—Large, round, dark, heart-shaped, yellow, mottled with red; flesh sweet, juicy, and delicious. Fruit hangs well on tree. June.

	Each	10	100
1-2 ft.	\$.60	\$ 5.50	\$ 50.00

PECANS

TEXAS PROLIFIC.—Large, rather long. Thin shell, fine kernel. Bears young. Heavy and sure bearer.

SUCCESS.—A fine nut of oblong shape, tree making a fine upright growth; a regular producer; you will be pleased with it.

MONEY MAKER.—A very popular nut and planted largely by all planters; the tree is a vigorous grower; nuts of good size; paper shell nuts.

BURKET.—Large almost round, shell thin. Flavor excellent. One of the best. Bears young and every year; fine.

SCHLEY.—Medium long; pointed; shell thin. meat plump, full, separating easily; quality best.

STUART.—Introduced by the late W. R. Stewart, of Ocean Springs, Mississippi. A standard among the high class pecan for commercial orchards. Nuts large; well shaped, and of fine appearance; reasonably thin shell; well flavored. The best pecan for either commercial or home growing.

	Each	10	100
1-2 ft.	\$1.25	\$11.00	\$ 90.00
2-3 ft.	1.75	16.00	150.00

5-6 ft.	4.00	38.00	

GRAPES

BRILLIANT.—A very strong grower; endures all climates well. Clusters large, often shouldered, open to compact. Berries large, light to dark red, translucent with a thin bloom, and very handsome; skin thin, rather tender, but seldom cracks; pulp meaty, yet tender, melting and delicious, having taste of Delaware. Ripe in mid-season.

CAMPBELL EARLY.—Clusters very large with large shoulders; berry black; of somewhat less pulp and better quality than Concord; a very showy, saleable grape of the Concord type. Ripe with Moore Early.

CARMAN.—One of the most profitable and popular varieties; splendid as a table grape as well as for grape juice, preserves and jelly. Cluster, very large, sometimes weighing two pounds; shouldered; very compact. Berries medium size, black with thin bloom, skin tough and thin; never cracks; pulp meaty; firm but tender when fully ripe; of splendid quality — far superior to Concord. Ripe in July.

IVES.—Bunch and berry medium in size; dark purple color; very acid until fully ripe; a good ordinary variety. Midseason.

DELEWARE.—Small, clear red, and of the very finest flavor; a

standard of excellence for table grapes and for marketing. Last of July.

MOORE EARLY.—Very large, early, black, of the fine quality; a fine market grape; very healthy and prolific.

R. W. MUNSON.—*Special*. Medium to large bunch; berry black; does not crack; pulp tender and quality good; ripens before Concord. Should be planted near Concord or Brilliant for pollenization.

CONCORD.—The best known of all varieties of grapes; large, black; suited for table or market. Ripe in July.

NIAGARA.—Large, greenish white; semi-transparent; quality good; a seedling of Concord; successful over a wide range of territory. Midseason.

FREDONIA.—Vine vigorous, hardy, very productive, resistant to powdery mildew; canes long, numerous, thick, straight; buds open with Concord, thick; flowers fertile, with long upright stamens, leaves large, round, black, skin thick, medium in toughness, separating from the flesh, pigment red, abundant, flesh greenish white, tender, solid, mild; quality very good.

	Each	10	100	1,000
One-year-old vines	\$.40	\$ 3.50	\$25.00	\$200.00
Two-year-old vines65	6.00	50.00	500.00

SPECIAL GRADE COMMERCIAL PLANTING GRAPE VINES

These vines will be one and two-year-old, light to very light tops, good rooted cutting, safe to plant into commercial vineyards, in the following varieties: Concord, Campbell Early, Moore Early, Ives, Fredonia and others.

100	500	1,000
\$12.50	\$60.00	\$110.00

BLACKBERRIES

EARLY HARVEST.—Very early. Fruit medium in size; juicy, tender, mild and good. It has a long fruiting season, carries well, and is especially good for canning.

MCDONALD.—One of the best blackberries grown. It is really a cross between the blackberry and the dewberry, combining the firmness and quality of the blackberry with the size, earliness and productiveness of the dewberry. The berries are large, and of good quality; enormously productive, out-yielding any other known variety of blackberry. Ripens very early, two weeks before Early Harvest. McDonald requires a pollenizer in order to develop perfect berries. Early Harvest is a good variety to plant with McDonald.

DALLAS.—A Texas berry, large, black, firm and a strong grower. Ripens in midseason.

OZARK.—This blackberry is remarkable in many ways, and is superior to any blackberry grown where it has become known. It is hardy, stands drouth, begins to bear about the same time the Early Harvest does, has a much longer bearing season.

BLOWER.—An old time variety grown more in the north and eastern part of the country, said to be very good, late.

EL DORADO.—A good grower, heavy canes more or less up-

right, hardy and will please you, a late variety, some of them should be in your planting.

	Each	100	1,000
One-year-old	\$.15	\$ 7.00	\$ 60.00

DEWBERRIES

AUSTIN.—Berries are much larger than those of any other dewberry or blackberry. It requires no trellis or stakes. The fruit is jet black and of very superior quality and flavor. For productiveness it out-rivals all dewberries.

LUCRETIA.—Fruit very large, luscious and sweet; perfectly hardy; healthy, enormously productive; very prolific.

MAMMOTH.—Very large; good, productive; will grow on any soil.

	Each	100	1,000
One-year-old	\$.15	\$ 7.50	\$ 60.00

RASPBERRIES

THE LATHAM RASPBERRY

We have added to our list this fine new berry; one of the best, and should be planted for each home use and the market. We believe you will find it to be far better than any other variety for every use of the raspberry fruit. Plants will make a good growth, multiply rapidly. Its fruit is large and showy, of a good flavor, red in color, will ship good and always commands the top price in the market.

CHIEF.—The New Red Raspberry. Here is a wonderful Red Raspberry that is forging ahead as fast as did its illustrious ancestors, Latham, and it has just as important a place to fill for it is ten days earlier than Latham, ripening at a time when Red Raspberries bring the most on all markets. Chief was originated at Minnesota State Fruit Breeding Farm. It is immensely productive.

CUMBERLAND.—The largest of all the black caps; coal black berries; very firm and the quality of the very best excellent shipper. Bush is a strong grower, stocky canes, and unusually prolific. Mid-season.

GREGG. *Black*.—Large size, vigorous and productive.

KANSAS.—Very large, black; a berry of splendid quality for general use and popular on the market.

ST. REGIS, *Red*.—A variety whose ripening period covers several months. The main crop is born in the spring and another good crop late in the summer and early fall. The berries are large, juicy sweet, and of highest quality.

	Each	100	1,000
One-year-old	\$.15	\$ 8.00	\$ 65.00

CURRANTS

FAY.—Very large, red; fine flavor; a great market currant; universally praised. Bush a cross between Cherry and Victoria, and very prolific.

PERFECTION.—Large; upright; red; quality very superior, rich, mild, subacid. Bush good grower and healthy foliage; long clusters and productive.

NEW BOYSENBERRY

RESERVE NOW

There have now been reserved more plants than were sold up to January 1st last season and if you desire to plant the Boysenberry this coming season it would surely be wise to make your reservation now. Not 1-10 of the population of the United States has seen or tasted this marvelous berry and when they do there is going to be the greatest stampede for these plants that has ever been known for any plant.

No. 1 Strong Tip Rooted Boysenberry Plants.

Plants 15c each; 100, \$8.00; 1,000, \$75.00; 5 at each rate; 50 at 100 rate; 500 at 1,000 rate.

Please send check with your reservation for at least one quarter of the total. It is understood the balance is to be paid just before shipment.

GOOD STRAWBERRY PLANTS

In making your plans for planting you will, without a doubt, be very careful to obtain the right kind of plants; for who wants to plant a field of strawberry plants, spend good money for cultivating and caring for it, unless he feels sure that the results will

be satisfactory? You will find our plants to be grown, dug, packed right and will please you.

EVERGREENS

Home builders of the Southwest have not realized the importance of properly planting evergreens. Every landscape should contain a few evergreens and shrubs to give the effect of life in the dead of winter. On some types of houses an entire foundation planting of evergreens is most attractive when located properly by giving them the right kind of treatment. You will be delighted with the results.

CEDRUS DEODARA.—A magnificent tree attaining a height of from 50 to 75 feet, its lower branches gracefully sweep the ground, giving the tree a stately appearance; foliage is feathery, and of a pleasing blue-green color. Succeeds admirably in this climate, and is to this section what the Koster Blue Spruce is to the North. Considered the most handsome of all growing specimen conifers. The young trees are beautiful and feathery, becoming more dignified and stately with age.

BROAD LEAF EVERGREENS

Broad leaf evergreens are truly the South's greatest floral treasure. No other section of our country can enjoy the striking landscape effect which their use produces. Many varieties lend beauty both with bloom and luxuriant evergreen foliage.

EUONYMUS.—Hardy ornamental plant with rich, handsome foliage, luxurious growth, naturally beautiful shape, can be made any desired form by trimming, has glistening round leaves, 18-24 inches, bare rooted, \$1.50 each; 24-30 inches, bare rooted, \$1.75 each; 36-42 inches, bare rooted, \$2.25 each. If wanted balled add 25 cents per plant.

NANDINA.—The delicate foliage of the plant is a brilliant dash of gorgeous orange-red, or crimson color in the winter; it is dense and stocky in growth — dwarfish growth with many of the plants late summer and fall showing a growth of berries same color as the leaves. It will please you. Price: 12-18 inches, \$1.00 each; 18-24 inches, \$1.75 each; 24-30 inches, \$2.00 each; 3-4 feet, \$2.50 each. All balled and burlapped.

ABELIA GRANDIFLORA.—One of our most beautiful popular and satisfactory broad-leaved Evergreens. The graceful drooping stems and branches are covered with dark, glossy leaves which in winter assume a metallic green. From the middle of May until frost this plant produces an immense quantity of tubular-shaped white flowers about an inch long which are borne in clusters. During the growing season it is advisable to pinch off the ends of the long shoots. This will make the plant dense and compact. For single specimens, for groups, or for a hedge we cannot too strongly recommend this plant, 2-3 feet, \$1.50 each; 3-4 feet, \$1.75 each; 4-5 feet, \$2.50 each; balled and burlapped.

NEW RED LEAVED JAPANESE BARBERRY.—It is similar in all respects to the green leaved Japanese Barberry which is so popular, but the foliage of this new variety is of a rich, lustrous, brandy red, similar to the richest red leaved Japanese Maples. All that is required to develop its brilliant coloring at all seasons is that it be planted in full exposure to the sun. 1-2 feet, \$1.00 each; 2-3 feet, \$1.50 each; 3-4 feet, \$2.25 each. If wanted balled and burlapped, add 25c per plant

BARBERRY THUNBERGH.—Neat and dense in growth. Produces yellow flowers in summer, followed by scarlet fruit, borne in dense profusion, clinging throughout most of the winter. Leaves color to scarlet and gold. Bare roots. 1-2 feet, 75c each; 2-3 feet, \$1.00 each; 3-4 feet, \$1.50 each. If wanted balled and burlapped add 25c each.

EUONYMU PATENTS (*Berry type*).—A good broad leaf plant, and will not winter kill, should be in every planting. Price: 12-18 inches, \$1.00 each; 18-24 inches, \$1.50 each; 24-30 inches, \$2.00 each; 30-36 inches, \$2.50 each; 36-48 inches, \$3.50 each. Balled and burlapped.

LUCIDUM COMPACTA.—Leaves are very thick and waxy, the upper surface being highly glossed of black-green color and underside of a lighter shade. Plant is very compact, heavily branched, ideal in form and development. Wax Privet grows in shade or full sunlight. Price, two-year-old plants, 18-24 inches high, at \$1.50 each; 24-36 inch plants, \$2.00 each; 3-4 feet, \$3.00 each; 4-5 feet, \$5.00 each. Balled and burlapped.

HYDRANGEA

PAICULATI GRANDIFLORA.—A fine hardy shrub, growing to the height of eight or ten feet; flowers white, great pyramidal panicals a foot long, produced in August or September, when most other shrubs are out of bloom.

SNOWBALL (*Opulus Starile*).—An old time favorite. Rather tall growing; foliage large and coarse; showy flowers in large white "balls" in April.

	Each	10
1-2 ft.	\$.75	\$ 7.00
2-3 ft.	1.00	9.00
3-4 ft.	1.50	12.50

EVERGREEN HEDGE

AMoor RIVER PRIVET.—For the South it is far superior to all other privets, as the Amoor River Privet retains its foliage throughout the entire year. It is without doubt the most popular evergreen hedge plant of the day. It is of rapid growth, adapts itself to almost any soil not too arid or extremely wet.

--------------	-------------	--------------

We have only about 2000 Rose Bushes for the coming season, all field grown plants, 2 year old roots, one year top regular 2 year old bushes. Send in your orders early for late fall and spring shipment, it will be appreciated.

NOTICE

All shipments made by mail will be at and travel the Customers risk, our responsibility ends with delivery to Post Office. Claims for error or shortage must be made within 10 days after receiving the shipment, if by express or freight, see that your shipment, bale or box when received is in good shape. if not have it shown on your paid freight or express receipt.

SPECIAL OFFER NO. 1

One-half acre home orchard of nice fruit trees to be planted twenty feet each way. One year old, first class stock, consisting of ten Early Wheeler, ten Hale, ten Elberta peaches; five Red June, five Delicious, five Red Winesap apples; and five Keifer pears. This will give you fifty-five trees to ripen over the entire season. Shipped by prepaid express for only \$22.00. You will be more than pleased with them.

SPECIAL OFFER NO. 2

Twenty-five grape vines in a nice assortment of popular varieties, No. 1 grade, one and two year plants. If desired you may select varieties. These vines delivered by mail for only \$7.50. Plant them now, nothing will pay you better.

SPECIAL OFFER NO. 3

Eighteen assorted trees and plants for your back yard or garden; four apple trees, two plum trees, six peach trees, two pear trees, two cherry trees, and two grape vines, two years old and the fruit trees 3-5 feet, nice clean stock that will be sure to please you. This all for \$10.00 so send us your order while you can still obtain nice stock for this low cost.

SPECIAL OFFER NO. 4

Do you want to plant a back lot or small plot in good Peach Trees that with good care and cultivation will come into bearing the third year. Send us only \$4.50 and fifteen assorted trees will be sent you postpaid, one year stock, about one foot in height. A good commercial grade tree in two or three varieties of your own selection. Also, will send you postpaid for \$6.00, eight Apple and two Pear Trees, varieties selected from booklet. If you need a few trees at a very small cost, do not overlook this offer.

SPECIAL OFFER NO. 5

We have a surplus of Spirea Van Houtti and are making this offer to our customers. Twenty nice two foot plants for only \$6.00 postpaid. This is a nice plant for foundation planting of your home or for use as hedge. These will grow fast and in a short time will be blooming and will last for years. If you need good shrubs you can not afford to pass them up at 40c each.

SPECIAL OFFER NO. 6

For only \$15.00, we will send you twelve assorted specimen plants in the following evergreens, balled in earth, packed F. O. B., Higginson: four Baker Pyramidal, two Excelsiors, four Irish Junipers, two Pfitzer Junipers, spreading type, all 18 to 24 inches. Plants are well developed ready for the planting of your home. You will find these plants to be of a grade that usually sells for double the amount asked above. If you can use twenty-four of them, the price will be \$26.50. Place your order now while you can get good plants at this price.

We want to call your attention to all of the items listed in this book and the very low prices made on the stock, and by comparison you will find much under what many of the other good nurseries are asking today, for the same goods, so while good Trees and Plants can be bought for so little, we hope to have the pleasure of receiving your order promptly for what you need. If any further information is wanted, ask us for it. It will be a pleasure to answer your inquiries.

TREATMENT OF TREES, ETC., THAT HAVE BEEN FROZEN IN THE PACKAGE OR RECEIVED DURING FROSTY WEATHER

Put them unopened in a cellar or some other cool, protected place, free from frost, or cover them up heavily or entirely with earth until they are fully thawed out, then they can be unpacked and planted or placed in trenches until convenient to plant.

Treated in this way they will not be injured by the freezing.

SUITABLE DISTANCES FOR PLANTING

	Feet		Feet
Apples, Standard	..20 to 40	Grapes,	6 by 8
Apples, Dwarf, ...	6 to 8	Currants,	3 by 4
Pears, Standard, ...	18 to 20	Gooseberries, ...	3 by 5
Pears, Dwarf	10 to 12	Raspberries, Red	.3 by 6
Peaches,	18 to 20	Raspberries, Bl.,	.4 by 6
Nectarines&Ap-cots	18 to 20	Blackberries, ...	3 by 8
Cherries, Sweet, ...	18 to 20	Str'berries in row	.1 by 4
Cherries, Sour, ...	18 to 20	Str'berries in beds	1½ by 1½
Plumbs,	18 to 20	Aspa'gus in beds	.1 by 1½
Quinces	8 to 10	Aspa'gus in fields	1 by 3

NUMBER OF TREES AND PLANTS ON AN ACRE AT VARIOUS DISTANCES

1 x 1 ft.	43,560	5 x 5 ft.	1,742
2 x 1 ft.	21,780	6 x 6 ft.	1,210
2 x 2 ft.	10,890	8 x 8 ft.	680
3 x 1 ft.	14,520	10 x 10 ft.	435
3 x 2 ft.	7,260	12 x 12 ft.	302
3 x 3 ft.	4,840	15 x 15 ft.	193
4 x 1 ft.	10,890	16 x 16 ft.	170
4 x 2 ft.	5,445	18 x 18 ft.	134
4 x 3 ft.	3,630	20 x 20 ft.	108
4 x 4 ft.	2,722	25 x 25 ft.	69
5 x 2 ft.	4,356	30 x 30 ft.	48
5 x 3 ft.	2,178	33 x 33 ft.	66

The number of plants required for an acre, at any given distance apart may be ascertained by dividing the number of square feet in an acre (43,560) by the number of square feet given to each plant, which is obtained by multiplying the distance between the rows by the distance between the plants. Thus strawberries planted 3 feet by 1 foot gives each plant 3 square feet or 14,520 plants to the acre.

THE REASON WHY YOU SHOULD BUY YOUR FRUIT TREES, FRUIT PLANTS AND OTHER NURSERY STOCK FROM US

All of our trees and plants are State Inspected and will please you in every way, and your order will have attached to it a copy of our inspection certificate from our State Plant Board.

We have been in the nursery business for many years, thereby attaining a full and complete knowledge of what varieties are giving best satisfaction in our trade territory, also of the best mode of propagating and growing stock, and of handling and caring for it when transplanting.

We are not making a specialty of growing a few sorts, such as apples, peaches, and cherries, but have a general nursery, thereby enabling the purchaser to select from a complete assortment of fruits, deciduous and evergreen trees, flowering shrubs, vines, roses, bulbs, etc., that are of superior quality and less cost than the same stock can be secured from other nurseries.

Our location is in the center of a great fruit-producing country. New sorts are continually being tested and either placed on the list as being worthy or discarded, thus enabling us to obtain the very best approved varieties.

We are located at the foot of the Ozark hills in the heart of the famous White County, Ark., strawberry district, on the Missouri Pacific Railway and Chicago, Rock Island and Pacific Railway, two largest railroad systems in the country, making our railroad facilities for quick transportation for perishable goods one of the best. We are enabled to ship direct to many points without risk of delay in transferring stock from one railroad to another.

We have a modern up-to-date plant, packing shed 90 feet wide and 200 feet long, our water system, lights, trucks, and cars, tractor, and use 15 to 18 head of mules to help carry on the work of growing trees and plants, using a tract of over 1,000 acres of land, with some 200 acres devoted to a general line of field grown trees and plants, and increasing the number of new acres each year. This, the present owner and manager has built up in the short time of 25 years. Surely this will speak well of the quality of our goods and the service we have given to our old customers in the past and it is our expectation to continue to do everything we can to please you in the future. Give us your order — it will have our personal attention, and sure it will please you.

APPLE TREES

BUY YOUR APPLE TREES NOW, WHILE
YOU CAN GET THEM AT THE VERY
LOW PRICES BELOW
